

Opportunity At Games2win for Web Developer

About Us:

Games2win (G2W) is one of the fastest growing online gaming companies in the world and features in the top 50 online gaming destinations in the world as per the latest comScore reports. G2W is funded by leading top tier investors such as Clearstone Venture Partners, Silicon Valley Bank and Nexus India Capital. G2W owns and operates www.games2win.com –a massively popular flash gaming website with over 5 million unique visitors a month, Inviziads (www.inviziads.com) - a unique in-game advertising network and www.gamecurry.com - the world's first flash games search portal.

The founders of G2W Inc are Alok Kejriwal - serial entrepreneur See - ([google link](#));([linkedin link](#)), and Mahesh Khambadkone -an online gaming specialist See - [linkedin link](#)

What's the opportunity?

Position: Web Developer

Based in: Mumbai

Reporting to: VP Engineering

Age & Experience: Above 24 and at least 2 years experience as a web developer developing multi-functional portals.

Background – Candidate would be part of the core development team of the Games2win company. Games2win operates multiple online businesses in the gaming space, including www.games2win.com (casual games portal), www.inviziads.com (in-game ad network) and www.gamecurry.com (world's first Flash games search engine). This position is primarily for engineering requirements of www.games2win.com, but the candidate will have the opportunity to work on any of the other portals.

www.games2win.com is a heavily trafficked site, reaching about 6 million consumers a month, and growing. Behind the scenes of all the games that are found on the site, there are a lot of back-end applications that exist and need to be developed. These include solutions for content managing, site usage statistics, player reporting, secure scoring systems, loyalty points management, social graphs, branded solutions, customized ad-serving, site performance management, SEO optimization and more.

We require a strong web developer to join the team and collaborate with game designers, website designers, graphic artists and portal managers, to help build a world leading casual games portal.

What the job is all about - Role & Responsibility:

Responsible for managing the destinations we run online, primarily games2win.com and our Orkut applications. This will involve:

- understanding new business
- designing and developing solutions for the same taking into consideration existing product status and tools
- coordinating with team-mates for execution of the project, including graphic designers to testers
- taking responsibility for timely and correct delivery of the solution
- ability to document relevantly and accurately

Desired Profile: Proficiency in ASP / PHP / JSP is a must, and not afraid to move between these scripting languages. Good knowledge of HTML, AJAX, CSS, SQL and JavaScript. Experience in object oriented programming. Ability to understand business problems, understand existing systems, and propose solutions based on sound algorithms, taking into consideration known business circumstances. Hands-on knowledge of load balancing and performance optimization techniques would be ideal. Prior experience working on online portals with open source technologies and frameworks is a must.

Desired Soft skills: Team player, good learner, problem solver, good communication skills.

Qualifications: B.E. / B.Tech or Science graduate. Certifications preferred.

Remuneration - As a practice, we have typically matched candidates existing packages + ADDEssD on lucrative performance incentives and of course ESOP's.*

* in the exit of mobile2win China to Disney – the group has now a proven track record of demonstrating how valuable its company esops can be.

The idea is to make the candidate actually take an ownership role and then provide additional compensation on performance.

Growth and prospects - This is a huge opportunity for someone who wants to be associated with ONLINE GAMING as an industry and be responsible for scaling up a start up venture to a large business. The scope to experiment, innovate and pioneer search and discovery ideas and concepts will be enormous. The success in popularizing a start up website through innovative features, user friendliness and speed will be a very impressive credential for any Lead Developer. The gaming market is poised for immense growth and the candidate can look forward to a very long term vertical growth curve in this industry.

The candidate can vertically grow into a Tech Lead position as he/she scales up.
